Calculating Percentages

Bringing math concepts to life.....

Regular Price	\$50 000.00	
Discount	\$10 000.00	20%
New Sales Price	\$40 000.00	
HST 12%	\$4 800.00	
Total Cost	\$44 800.00	

You are the Owner of
a Brand New
Company in
Coquitlam

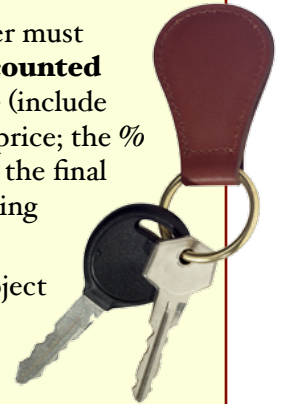

Your task:

Create an eye catching sales flyer that will attract customers to your grand opening.

1) The flyer must show your **company name**, **location** and the **products that you are featuring** in your promotion (cars, clothing, food etc.).

2) The flyer must show a **discounted sales price** (include the regular price; the % discount & the final price including tax).

3) The project can be completed in pairs or solo.

ON A SEPARATE PAGE, INCLUDE THE FOLLOWING INFORMATION:

Wholesale cost of product (cost of the product. It includes shipping and taxes that you pay supplier)

Sales Staff Commission Rate (what you will pay your sales staff for each product they sell - % or \$)

Sales Margin (your profit) (Sale price - Commission - Wholesale cost = your profit)

How many units you need to sell per day to make a reasonable profit.

Bonus marks for people who consider the other costs of doing business. What are they? Find out!
